

## Employee Learning Trends: The Future of Training in 2023

### Wearable Technology in Employee Training

Provide learning at fingertips

VR headsets & smartwatches have widened the horizon for eLearning.

### Need-based Learning

Understand employee needs

Stop training employees in skills they will never use. Embrace need-based learning to evolve your workforce.

### VR-based Gamification

Enhance learning engagement

VR-based gamification creates simulated environments for employees to put their skills to practical use.

### Social Media-based Learning

Facilitate employee collaboration

Learning communities that promote social learning & collaboration lead to better engagement.
