

Tenneo LMS Vision - 2025

AI-driven catalyst for smarter learning.

After the success of V8.3, we are proud to take the next step towards realising Tenneo's vision for 2025, introducing a new era of learning innovation and user-centric advancements. Centred around three transformative pillars – AI in LMS, Next-Gen UI/UX Design, & Seamless Integrations with Multiple Partners – this release will reflect our unwavering commitment to making learning matter & delivering user-centric learning experiences to ensure seamless success.

AI in LMS

Artificial Intelligence has transformed how we learn and interact with content. Tenneo LMS will further leverage the role of AI in learning to empower organisations with a more personalised, engaging, and adaptive learning environment.

AI-enabled Content Creation:

Easily generate high-quality training content with AI capabilities and streamline the content creation process. Reduce admin workload, enhance content creation efficiency, and eliminate errors.

Personalised AI Coach:

A learning partner that acts as a 24/7 virtual mentor, offering real-time guidance, tailored recommendations, and support for every learner's unique journey.

Smart AI Search:

Save time with a powerful search engine designed to deliver personalised and precise results. Quickly access relevant content, reducing search time and maximising productivity.

Multi-lingual AI Capabilities:

Enable cross-cultural learning with multi-lingual front end along with seamless content translation and localisation capabilities. Expand your global reach and make learning accessible to diverse teams.

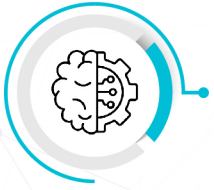

AI-powered Micro-learning:

Boost engagement with flashcards and bite-sized learning content in diverse formats. Keep learners motivated with digestible, on-the-go learning experiences.

Skill Mapping with AI:

Create organisation-wide skills and competency heatmaps and design targeted upskilling pathways to bridge the workforce skill gaps with AI-powered insights.

Adaptive AI Learning:

Personalise learning paths and assessments to meet individual learning objectives, styles and performance goals. Deliver a tailored learning experience that maximises impact and retention.

Predictive Analytics:

Leverage actionable insights through intuitive reporting tools with predictive analytics to optimise learner progress and outcomes. Make data-driven decisions to enhance learner success and ROI.

AI-driven Training Scheduler:

Eliminate manual effort with automated scheduling assistant for streamlined operations. Save administrative time and focus on strategic tasks that add value.

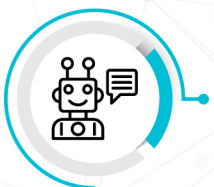

Smart Notifications:

Keep learners on track with timely, personalised reminders and nudges. Enhance learner engagement and ensure timely course completions.

Smart Content Becomes Smarter:

Enhance learning engagement with Smart Content, which will be capable of reading different file types.

Enhanced Tenneo Assistant:

Deliver instant, accurate responses to a wider range of user queries with a more powerful Tenneo Assistant. Empower users with stronger navigation support and help admins work faster and more efficiently.

Next-Gen UI/UX Design

Usability and design are key factors in maximising LMS adoption. The UI/UX of Tenneo LMS will further enhance the user experience and focus on delivering a modern, more intuitive, and visually appealing interface for all users.

Enhanced Learner-centric Design:

Elevate the learning experience with a more intuitive user experience that simplifies navigation, reduces clicks and makes it easier for learners to engage with the platform.

New App launch:

Introducing a brand-new mobile app experience for learners and admins, delivering higher performance, unmatched efficiency, and a more intuitive, user-friendly interface. Experience seamless learning on the go like never before!

Key Benefits

Consistent Visual Identity:

Harmonised visual styles across the platform will ensure a professional and cohesive look.

Simplified User Interface:

Minimalistic design will reduce cognitive load, making the platform more user-friendly.

Powerful Data Insights:

Revamped analytics dashboards with visually compelling charts and graphs will enable users to track key data points for better decision making.

Seamless Multi-Device Experience:

Optimised for all devices, including desktops, tablets, and smartphones.

Seamless Integrations with Multiple Partners

As the landscape of corporate learning evolves, organisations require a learning ecosystem that fosters learning, collaboration, and performance tracking. Tenneo LMS will create a connected learning ecosystem by forging strategic partnerships with best-in-class platforms across key industries - **OTS Content Providers, Rewards and Recognition Platforms, Content Authoring Tools, HRMS, and more.**

OTS Content Providers: Access a curated library of high-quality content, enabling quick skill acquisition and enriching the learning experience.

Rewards and Recognition Platforms: Link learning milestones to rewards, driving engagement and motivating learners to excel.

Content Authoring Tools: Create dynamic, personalised content tailored to workforce needs, seamlessly integrated for a more engaging experience.

Through these strategic integrations, Tenneo LMS will empower organisations to create a unified, intelligent learning ecosystem. Tenneo LMS will position itself as the central hub of your organisation's learning journey.

Closing Remarks

This release represents a major leap forward in redefining the learning experience. By integrating advanced AI capabilities, seamless partner integrations, and a user-centric design, we are setting new standards in learning innovation.

With this vision, our focus is on delivering tangible value to organisations, enabling more personalised, efficient, and impactful learning journeys. With this roadmap, we are committed to empowering teams to achieve their full potential, driving both learning growth and business success.
