

What is AI Accountability in Corporate Learning?

AI Accountability means organizations must ensure AI used in learning platforms is:

Transparent

Monitored and auditable

Fair and unbiased

Compliant with regulations

Explainable to employees and regulators

In corporate learning, this means:

- AI recommending learning paths must be explainable
- Skills analytics must avoid bias
- AI coaching must be auditable
- Learning decisions must have human oversight

Why AI Accountability Matters in Learning

As LMS platforms become AI-driven talent systems, they influence:
