

Skills Intelligence

For CLOs

Stop flying blind on your workforce.

Every skill gap, every decay curve, every succession risk, on one screen, updated live. Not a report you read once a quarter.

See the gap before it costs you

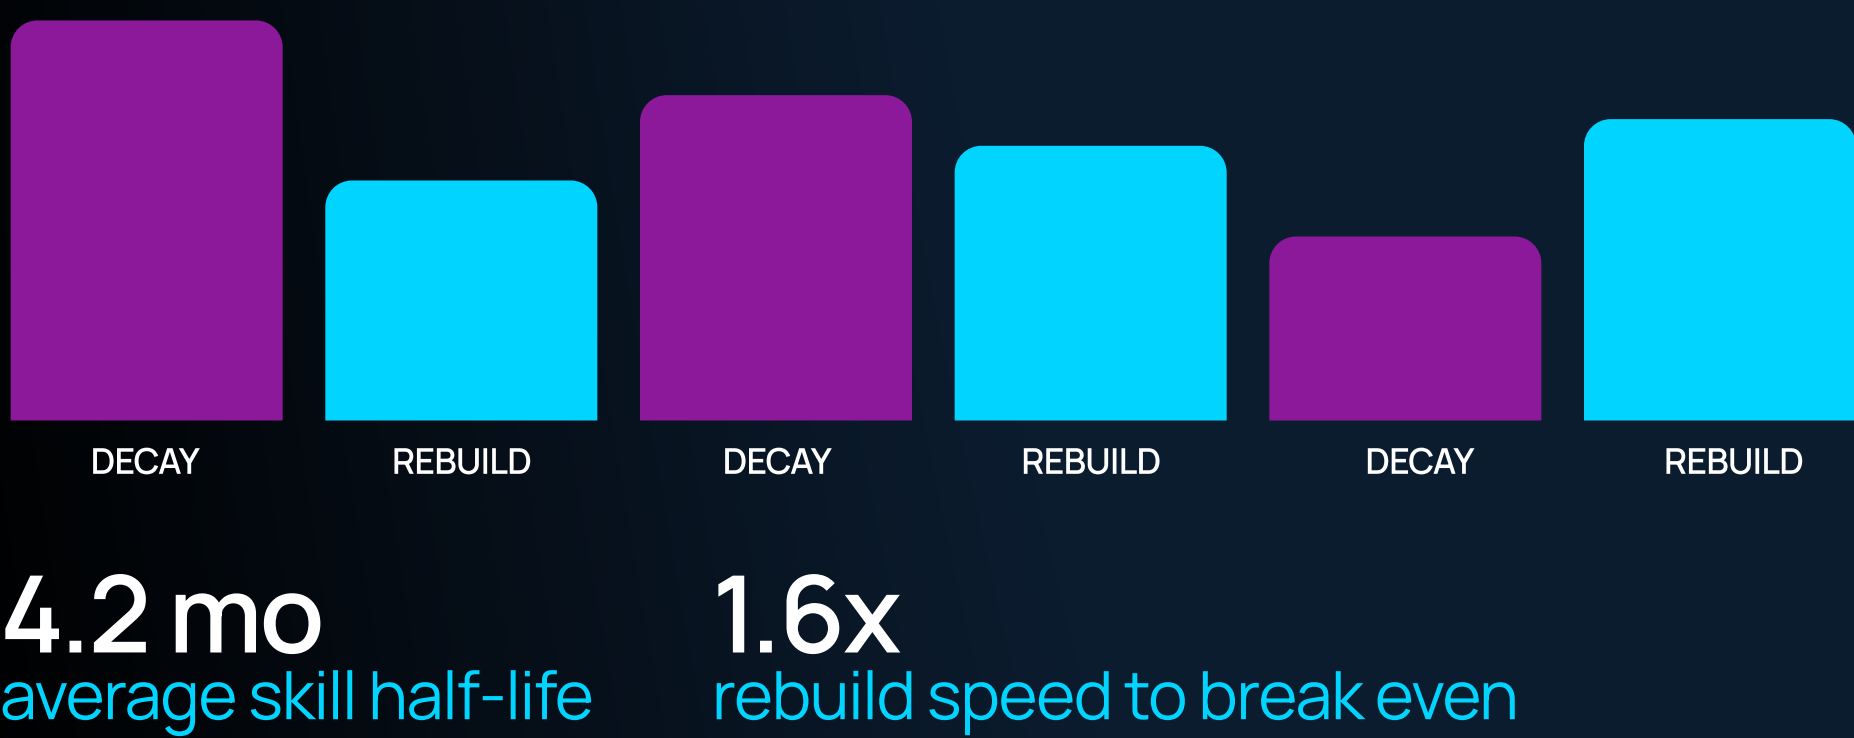

One glance tells you where to hire, where to train, and where you're one departure from a real problem.

Is training keeping up?

A certification from last year may already be half-obsolete. Velocity shows you the race, not the finish line.

If decay is outpacing rebuild, your training budget is running in place.

One resignation from a crisis?

Find out which critical roles have a ready successor, and which don't, before you're forced to find out the hard way.

Two of four critical roles here have zero ready backups. That's a fixable problem — if you can see it.

VP, Platform Eng. Engineering	● ● ●
Regional Sales Dir. Revenue	● ● ●
Plant Ops manager Operations	● ● ●
Data Security Lead IT	● ● ●

The dashboard only earns its screen time if it moves numbers the board already cares about.

See coverage, velocity, and bench strength update in real time, built into the LMS your teams already use.
